Before Getting Started...

This section provides an overview of your watch and explains how to connect with a phone. While there is a connection with a phone, you can have the watch’s time setting adjusted in accordance with the phone’s time setting or change the watch’s time settings.

Note

- The illustrations included in this operation guide have been created to facilitate explanation. An illustration may differ somewhat from the item it represents.

Navigating Between Modes

Press (C) to cycle between modes.
- In any mode, hold down (C) for about one second to enter the Timekeeping Mode.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Displayed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Timekeeping</td>

<tr>
<td>Stopwatch Mode</td>
<td></td>
</tr>
<tr>
<td>World Time Mode</td>
<td></td>
</tr>
</tbody>
</table>

Connecting with a Phone

Hold down (C) for about three seconds to establish a connection with a phone.
- To disconnect, press any button.

Important!

- Depending on light intensity and local conditions, the watch may become hot to the touch when exposed to light for charging. Take care to avoid burn injury after charging. Also, avoid charging the watch under high-temperature conditions like the ones described below.
  - On the dashboard of a vehicle parked in the sun
  - Near an incandescent light bulb or other source of heat
  - Under direct sunlight or in other hot areas for long periods

Solar Charging

This watch runs on power supplied from a rechargeable (secondary) battery that is charged by a solar panel. The solar panel is integrated into the face of the watch, and power is generated whenever the face is exposed to light.

- Charging the Watch

When you are not wearing the watch, put it in a location where it is exposed to bright light.

While you are wearing the watch, make sure that its face (solar panel) is not blocked from the light by the sleeve of your clothing. Power generation efficiency is reduced even when the face of the watch is blocked only partially.

Indicators

1. Displayed while Power Saving is enabled.
2. Displayed while Auto Light is enabled.
3. Displayed after time adjustment using time signal reception or connection with a phone was successful.
4. Displayed while there is connection between the watch and a phone.
5. Displayed during p.m. times while 12-hour timekeeping is being used.
6. Displayed while the watch is indicating summer time.
7. Displayed while battery power is low
8. Displayed while an alarm is turned on.
9. Displayed while the hourly time signal is enabled.
10. Displayed while the operation tone is muted.
11. Displayed while the snooze alarm is enabled.
● Low Battery
A low battery will cause [LOW] to flash and will disable the functions below.
- Time signal reception
- Illumination
- Sounds (alarms, etc.)
- Connection with a phone

If the charge level drops even further, [CHG] will flash. If this happens, all functions are disabled.

● Dead Battery
The digital display will go blank if the battery goes dead. Memory data is lost, and watch settings are returned to their initial factory defaults.

**Important!**
- Should the battery go low or go dead, expose the face (solar panel) to light as soon as possible.
- Exposing the watch to light while its battery is dead will cause [CHG] to start flashing. Keep the watch exposed to light until the current time appears on the display.

**Note**
- If [R] is flashing, it means that all functions, except for timekeeping, are disabled due to high momentary battery power consumption.

**Charging Time Guidelines**
The table below shows guidelines for approximate charging times.

<table>
<thead>
<tr>
<th>Light Intensity</th>
<th>Approximate Charging Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>8 minutes</td>
</tr>
<tr>
<td>Low</td>
<td>30 minutes</td>
</tr>
<tr>

<td>8 hours</td>
</tr>
</tbody>
</table>

**Time Required to Achieve Next Charge Level**

<table>
<thead>
<tr>
<th>Light Intensity</th>
<th>Charge Level 1</th>
<th>Charge Level 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>3 hours</td>
<td>45 hours</td>
</tr>
<tr>
<td>Low</td>
<td>10 hours</td>
<td>168 hours</td>
</tr>
<tr>
<td></td>
<td>16 hours</td>
<td>270 hours</td>
</tr>
<tr>
<td></td>
<td>208 hours</td>
<td></td>
</tr>
</tbody>
</table>

Charge Level 1:
Time from dead battery until hand movement starts

Charge Level 2:
Time from hand movement start until a full charge

**Light Intensity**
- Sunny day, outdoors (50,000 lux)
- Sunny day, near a window (10,000 lux)
- Overcast day, near a window (5,000 lux)
- Indoor fluorescent lighting (500 lux)

**Note**
- Actual charging time depends on the local charging environment.

**Power Saving Function**
Leaving the watch in a dark location for about one hour between the hours of 10 p.m. and 6 a.m. will cause the display to go blank, and the watch to enter Level 1 power saving. If the watch is left in this condition for six or seven days, the watch will enter Level 2 power saving.

Power Saving Level 1:
Digital display goes blank to save power. The watch can connect with a phone at this level.

Power Saving Level 2:
Digital display goes blank to save power. All functions are disabled.

**Recovering from Power Saving Operation**
Use one of the operations below to exit power saving.
- Press any button.
- Move the watch to a bright location.
- Trigger auto light by angling the watch towards your face.

**Note**
- The watch will not enter power saving in the cases below.
  - Alarm Mode
  - While in the Stopwatch Mode
  - While in the Timer Mode
- You can enable or disable Power Saving.
  - Configuring Power Saving Function Settings
- Note that the watch also may enter power saving if its face is blocked from light by your sleeve while you are wearing it.
Connecting with a Phone

To connect the watch with a phone, first install the CASIO “G-SHOCK Connected” app on the phone and then use Bluetooth to pair the watch with the phone.

● Install the app on your phone.
Depending on your phone type, tap one of the links below to install G-SHOCK Connected.

iOS (iPhone) Users

Android™ (GALAXY, etc.) Users

● Configure Bluetooth settings.
Enable the phone’s Bluetooth.

Adjusting the Time Setting

Your watch can receive time signals and connect with a phone to obtain information that it uses to adjust its date and time setting.

Important!

● Disable auto time adjustment whenever you are inside an aircraft or in any other area where radio wave reception is prohibited or restricted.

Note

● For details about setting procedures, see your phone documentation.

● Pair the watch with a phone.
Before you can use the watch in combination with a phone, you first need to pair them.

1. Move the phone to be paired with (within one meter of) the watch.
2. On the phone’s Home Screen, tap the “G-SHOCK Connected” icon.
3. Follow the instructions on the phone’s screen to pair with the watch.
   • If a pairing prompt message appears, perform the operation shown on the phone screen.
   • If pairing fails for some reason, [NG] will appear on the display momentarily and then normal timekeeping will resume. Perform the pairing procedure again from the beginning.

Pairing started. Pairing complete.

Important!

● The watch may not be able to perform auto time adjustment under the conditions described below.
   - While it is too far away from its paired phone
   - While communication is not possible due to radio interference, etc.
   - While the phone is updating its system

Connecting with a Phone to Adjust the Watch’s Time

You can configure watch settings to connect with a phone at preset times each day and adjust its time settings in accordance with information obtained from an online time server.

● Using Auto Adjust
Your watch adjusts its time setting four times a day according to a preset schedule. If you leave your watch in the Timekeeping Mode, it will perform the adjustment operation automatically as you go about your daily life, without any operation required by you.

1. Move the phone close to (within one meter of) the watch.
2. On the watch, enter the Timekeeping Mode.
3. Press (D).
   [TIME] flashes to indicate that the watch has started the connection operation. Once the watch and phone are connected, [OK] will appear, and then the watch will adjust its time setting with the online time server.

Note

● The connection is terminated automatically after time adjustment is complete.

● If time adjustment fails for some reason, [NG] will appear.

● [RCVD] flashes when the receiving operation starts, and [RCVD] appears after it is complete.
Time Adjustment Using a Time Signal

Overview
The watch’s time and day settings can be adjusted in accordance with a received time signal.

Important!
- If you are in a location where a time signal can be received and you want to receive the signal, select a city in your time zone that supports time signal reception as your Home City. The watch will not indicate the correct time if the Home City setting is wrong.
- The watch will normally not perform auto signal receive while it is paired with a phone. However, auto receive will be performed if there is no connection between the watch and phone for more than one day.

Note
- Areas where time signal reception is supported are limited. When the watch in an area where time signal reception is not possible, connect with a phone to adjust time and day settings.
- Even if you are within the normal reception range of a time calibration signal, reception may be made impossible by the following factors: geographic contours, weather, the season, the time of day, wireless noise.

Appropriate Signal Reception Location
A time calibration signal can be received while the watch is near a window.
- Keep metal objects away from the watch.
- Do not move the watch.
- Do not perform any operation on the watch.

Note
- You may experience time calibration signal reception problems in the areas described below.
  - Among or near buildings
  - While riding in a vehicle
  - Near household appliances, office machines, mobile phones, etc.
  - On a construction site, in an airport, or any other location where radio wave interference occurs
  - Near high-voltage lines
  - In mountainous areas or behind a mountain

Time Signal Reception Ranges
Time calibration signal reception is supported in the areas shown below.

- **Japan Time Calibration Signal (JJY)**
  - Fukushima
  - Saga

- **Chinese Time Calibration Signal (BPC)**
  - Chengdu
  - Shangqiu
  - Hong Kong
  - Shanghai
  - Beijing
  - Changchun

- **U.S. Time Calibration Signal (WWVB)**
  - Los Angeles
  - Denver
  - Fort Collins
  - Chicago
  - New York

- **U.K. (MSF) and German (DCF77) Time Calibration Signal**
  - Anthorn
  - Mainflingen

Note
- You may experience time calibration signal reception problems in the areas described below.
  - Among or near buildings
  - While riding in a vehicle
  - Near household appliances, office machines, mobile phones, etc.
  - On a construction site, in an airport, or any other location where radio wave interference occurs
  - Near high-voltage lines
  - In mountainous areas or behind a mountain

Time Signal Reception Ranges
Time calibration signal reception is supported in the areas shown below.

- **Japan Time Calibration Signal (JJY)**
  - Fukushima
  - Saga

- **Chinese Time Calibration Signal (BPC)**
  - Chengdu
  - Shangqiu
  - Hong Kong
  - Shanghai
  - Beijing
  - Changchun

- **U.S. Time Calibration Signal (WWVB)**
  - Los Angeles
  - Denver

  - Anthorn
  - Mainflingen

Note
- You may experience time calibration signal reception problems in the areas described below.
  - Among or near buildings
  - While riding in a vehicle
  - Near household appliances, office machines, mobile phones, etc.
  - On a construction site, in an airport, or any other location where radio wave interference occurs
  - Near high-voltage lines
  - In mountainous areas or behind a mountain
Auto Time Signal Receive

An automatic time calibration signal receive operation is performed and the time and day settings are adjusted between midnight and 5:00 a.m. Once a signal receive operation is successful, no more auto receive operations are performed that day.

Getting Ready

Enter the Timekeeping Mode.

Navigating Between Modes

Place the watch near a window or some other location appropriate for signal reception.

- [RCVD] flashes while time signal reception is in progress.
- If the receive operation is successful, [OK] will appear, and then the watch will automatically adjust its time and day settings.

Note

- Reception takes anywhere from about two minutes to about 10 minutes. It can take as long as 20 minutes.

Manual Time Signal Receive

1. Place the watch near a window or some other location appropriate for time signal reception.
2. Enter the Timekeeping Mode.
3. Hold down (D) for about two seconds. Release the button after [RCVD] starts flashing.

This indicates that time signal reception has started.

Getting ready to receive  
Receiving

Note

- When a receive operation is successful, [RCVD] will appear, and the time and day settings will be adjusted automatically.
- [RCVD] will disappear and [NG] will be displayed if connection fails for some reason. To return to the Timekeeping Mode with the unadjusted time setting displayed, press any button.

Receive Level Indicator

While a receive operation is in progress, its current status is indicated on the display as shown below. The level indicator changes in accordance with the signal quality. Use the level indicator to find a location where signal reception is stable.

![Receive level indicator](image)

Unstable  
Stable

Signal Reception Precautions

- When the watch is unable to adjust its time in accordance with a calibration signal for some reason, average timekeeping accuracy is within ±15 seconds per month.
- Note that an internal decoding process the watch performs after it receives a signal may cause the time setting to be slightly off (by less than one second).
- Time signal reception is not possible when any one of the conditions below exists.
  - While battery power is low
  - While the watch is in the Stopwatch Mode, Timer Mode, or Alarm Mode
  - In Power Saving Level 2
  - Timer countdown operation in progress
  - While auto time adjustment is disabled
- If the receive operation is successful, the time and day settings will be adjusted automatically in accordance with the Home City and summer time settings. Summer time will not be applied correctly in the cases described below.
  - When the summer time start date and time, end date and time, or other rules are changed by authorities
  - As of July 2017, China does not observe summer time. If China starts to observe summer time in the future, the time displayed by the watch for China may not be correct.

Using the Watch in a Medical Facility or Aircraft

Whenever you are in a hospital, on an aircraft, or in any other location where auto signal receive or connection with a phone may cause problems, you can perform the procedure below to disable it. To re-enable auto time adjustment, perform the same operation again.

1. Hold down (A) for about two seconds until [HT] flashes.
2. Press (C) 13 times. This displays [RECEIVING].
3. Press (D) to select the auto time adjustment setting you want.
   - [OFF]: Disable auto time adjustment.
   - [On]: Enable auto time adjustment.
4. Press (A) to exit the setting screen.

Using Mobile Link with a Mobile Phone

While there is a Bluetooth connection between the watch and phone, the watch time setting is adjusted automatically in accordance with the phone’s time setting. You can also change the watch’s settings.

Note

- This function is available only while G-SHOCK Connected is running on the phone.
- This section describes watch and phone operations.
  - : Watch operation
  - : Phone operation
Connection

Connecting with a Phone
This section explains how to establish a Bluetooth connection with a phone that is paired with the watch.

- If the watch is not paired with the phone you want to connect with, refer to the information below and pair them.

.pair the watch with a phone.

1. Move the phone close to (within one meter of) the watch.
2. Hold down (C) for about three seconds until \( e \) and \([CNCT]\) flash on the display.

When a connection is established between the watch and phone, \( e \) and \([CNCT]\) will stop flashing.

- If connection fails for some reason, \([NG]\) will appear on the display momentarily and then the watch will return to the Timekeeping Mode.

Note
- If you have problems establishing a connection, it could mean that G-SHOCK Connected is not running on the phone. On the phone’s home screen, tap the “G-SHOCK Connected” icon. After the app starts up, hold down the watch’s (C) button for about three seconds.

Disconnecting from a Phone
Pressing any button will terminate a Bluetooth connection and return to the Timekeeping Mode.

Unpairing
1. If the watch is connected with a phone, press any button to terminate the connection.
2. Tap the “G-SHOCK Connected” icon.
3. Perform the operation shown on the phone screen to unpair.

Note
- If you are unable to re-pair the watch with a phone after unpairing them, use the procedure below to delete pairing information from the watch and then perform the pairing operation again.

If you purchase another phone
You need to perform the pairing operation whenever you want to establish a Bluetooth connection with a phone for the first time.

.pair the watch with a phone.

1. Hold down (A) for about two seconds until \([HT]\) flashes on the display.
2. Press (C) twice. This causes the seconds to flash.
3. Hold down (B) for about three seconds. Release the button when \([Hold]\) disappears and \([CLR]\) appears. This deletes the pairing information from the watch and returns to the timekeeping display.
Configuring Reminder Settings

After you use G-SHOCK Connected to create a reminder for an appointment, anniversary, or some other event you don’t want to forget, the watch will remind you when that day is reached.

• You can have up to five reminders registered.

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display.
   When a connection is established between the watch and phone, $ and [CNCT] will stop flashing.
   • If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.

3. Follow the instructions that appear on the screen to configure reminder settings.
   • You can input up to 18 alphanumeric characters as a reminder title.

Configuring World Time Settings

Specifying a World Time City with G-SHOCK Connected causes the watch’s World Time City to change accordingly. Watch settings can be configured for auto summer time switching for the World Time City.

Note

• G-SHOCK Connected World Time lets you select from among approximately 300 cities as the World Time City.

• Selecting a World Time City

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display.
   When a connection is established between the watch and phone, $ and [CNCT] will stop flashing.
   • If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.

3. Perform the operation shown on the phone screen. The World Time setting will be reflected on the watch.

Creating a User City

In addition to the approximately 300 cities available with G-SHOCK Connected, you can specify a location on an on-screen map and create a user city.

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display.
   When a connection is established between the watch and phone, $ and [CNCT] will stop flashing.
   • If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.

3. Perform the operation shown on the phone screen. The World Time setting will be reflected on the watch.

Note

• You can have up to five locations registered as user cities.
• You can assign a name up to 18 characters long to each user city.
Configuring the Summer Time Setting

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display.
   - If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.
3. Perform the operation shown on the phone screen to select a summer time setting.
   - “Auto” The watch switches between standard time and summer time automatically.
   - “OFF” The watch always indicates standard time.
   - “ON” The watch always indicates summer time.

Note

- While the summer time setting is “Auto”, the watch will switch between standard time and summer time automatically. You do not need to switch between standard time and summer time manually. Even if you are in an area that does not observe summer time, you can leave the watch’s summer time setting as “Auto”.
- Changing the time setting manually with a watch operation will cancel auto standard time/summer time switching.
- For information about summer time periods, refer to the “Summer Time Table” or G-SHOCK Connected.

Swapping Your World Time and Home Time

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display.
   - When a connection is established between the watch and phone, $ and [CNCT] will stop flashing.
   - If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.
3. Perform the operation shown on the phone screen to swap your Home Time with your World Time.

Note

- Auto time adjustment does not work for 24 hours after swapping of the Home Time and World Time.

Phone Finder

You can use phone finder to trigger a tone on the phone to make it easy to find. The tone is forced to sound even if the phone is in vibrate mode.

Important!

- Do not use this function in areas where phone call tones are restricted.
- The tone sounds at a high volume. Do not use this function when listening to phone output over earphones.

Configuring Watch Settings

Alarm time, timer start time, and other settings can also be configured using G-SHOCK Connected.

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display.
   - When a connection is established between the watch and phone, $ and [CNCT] will stop flashing.
   - If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.
3. Press any button to stop the tone.
   - You can press any watch button to stop the phone tone only during the first 30 seconds after it starts to sound.
Changing the Home City Summer Time Setting

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display. When a connection is established between the watch and phone, $ and [CNCT] will stop flashing.
   - If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.
3. Perform the operation shown on the phone screen to change your World Time summer time setting.

Checking the Watch Charge Level

Use the procedure below to check the current charge level with G-SHOCK Connected.

1. Tap the “G-SHOCK Connected” icon.
2. Hold down (C) for about three seconds until $ and [CNCT] flash on the display. When a connection is established between the watch and phone, $ and [CNCT] will stop flashing.
   - If connection fails for some reason, [NG] will appear on the display momentarily and then the watch will return to the Timekeeping Mode.
3. Use G-SHOCK Connected to check the charge level.

Reminders

If you use G-SHOCK Connected to record an appointment, anniversary, or some other event you don’t want to forget, the watch will remind you when that day is reached.

Getting Ready
Enter the Timekeeping Mode.

Navigating Between Modes

Checking Reminder Notifications

(REM) flashes on the display during a day is when there is an anniversary or event that was created with G-SHOCK Connected. Pressing any button other than (B) will display the title assigned to the reminder.

Note
- Use G-SHOCK Connected to create reminders.

Checking World Time

Entering the World Time Mode causes the World Time number and city name to appear first. After that, the display will appear as shown below.

Note
- If you turn on display illumination on a reminder date, the display light will flash red for a few seconds after illumination automatically turns off.
World Time City Setting
You can specify up to five cities as your World Time favorites. If you are in an area that observes summer time, you can also enable or disable summer time.

Note
- The initial factory default summer time setting for all cities is “AUTO”. In many cases, the “AUTO” setting lets you use the watch without switching between summer time and standard time.

1. Use (D) to display the World Time number whose setting you want to configure.
2. Hold down (A) for about two seconds. This causes [WT] to flash on the display.
3. Use (D) and (B) to display the city you want to assign to the World Time number.
4. If you want to change the summer time setting, press (C).
5. Use (D) to select a summer time setting. Each press of (D) cycles through available settings in the sequence shown below.
   - [AUTO] The watch switches between standard time and summer time automatically.
   - [OFF] The watch always indicates standard time.
   - [ON] The watch always indicates summer time.
6. Press (A) to exit the setting screen.

Swapping Your Home City Time and World Time
Press (A) and (B) at the same time to swap your Home City time and World City time.

Note
- This function comes in handy when you need to move to another time zone. For details about how to use it, go to the section below.

Alarms and Hourly Time Signal
The watch will beep when the alarm time is reached. You can configure up to four standard daily alarms, and one daily alarm with snooze. The hourly time signal causes the watch to beep every hour on the hour.
- Snooze causes the alarm to sound up to seven times, at five-minute intervals.
- The alarm sound is muted in the cases described below.
  - When battery power is low
  - When watch is at Level 2 power saving

Getting ready
Enter the Alarm Mode.

Configuring Alarm Settings
1. Use (D) to display the alarm screen (alarm number [1] to [4] or [SNZ]) whose setting you want to change.
2. Hold down (A) for about two seconds. This causes the hour digits to flash.
3. Use (D) and (B) to change the hour setting.
   - If you are using 12-hour timekeeping, [P] indicates p.m.
4. Press (C). This causes the minute digits to flash.
5. Use (D) and (B) to change the minute setting.
6. Press (A) to exit the setting screen.
7. Press (C) three times to return to the Timekeeping Mode.
Enabling/Disabling an Alarm or the Hourly Time Signal

1. Use (D) to display the item whose on/off setting you want to change: alarm number [1] to [4] or [SNZ], or the hourly time signal ([SIG]) screen.

2. Press (A) to toggle the displayed alarm or the hourly time signal between on and off.

Stopping an Alarm

Pressing any button while the beeper is sounding stops it.

Determining an Alarm’s On/Off Status

Turning on an alarm or the hourly time signal causes the corresponding indicator to appear on the display.

Stopwatch

The stopwatch can measure elapsed time up to 23 hours, 59 minutes, 59 seconds (24 hours).

Getting ready

Enter the Stopwatch Mode.

Measuring Elapsed Time

1. Use the operations below to measure elapsed time.

   - Elapsed time is shown in 1/100-second units for the first hour of the measurement. After the first hour, elapsed time is shown in one-second units.

   1. Start
   2. Stop
   3. Resume
   4. Stop

   1. Each press of (D) causes the elapsed time up to that point (split time) to be indicated.

   1. Start
   2. Split
   3. Split release
   4. Stop

   - Elapsed time is shown in 1/100-second units for the first hour of the measurement. After the first hour, elapsed time is shown in one-second units.

   1. First hour
   2. After first hour

   1. Minutes, seconds, 1/100 seconds
   2. Hour, minute, second

   1. Minutes, seconds, 1/100 seconds
   2. Hour, minute, second

   2. Press (A) to reset the elapsed time to all zeros.

Measuring a Split Time

1. Use the operations below to measure elapsed time.

   - Each press of (D) causes the elapsed time up to that point (split time) to be indicated.

   1. Start
   2. Split
   3. Split release
   4. Stop

   - Elapsed time is shown in 1/100-second units for the first hour of the measurement. After the first hour, elapsed time is shown in one-second units.

   1. First hour
   2. After first hour

   1. Minutes, seconds, 1/100 seconds
   2. Hour, minute, second

   1. Minutes, seconds, 1/100 seconds
   2. Hour, minute, second

   2. Press (A) to reset the elapsed time to all zeros.
Timing the First and Second Place Finishers

1. Use the operations below to measure elapsed time.

   - 1st Finisher*
   - 2nd Finisher*

   * This displays the time of the first finisher.

   - Elapsed time is shown in 1/100-second units for the first hour of the measurement. After the first hour, elapsed time is shown in one-second units.

2. Press (A) to display the time of the second finisher.

3. Press (A) to reset the elapsed time to all zeros.

Timer

The timer counts down from a start time specified by you. A beeper sounds when the end of the countdown is reached.

- The beeper is muted in the cases described below.
  - When battery power is low

Getting Ready

Enter the Timer Mode.

Navigating Between Modes

Setting the Time

The countdown start time can be set in 1-second units up to 24 hours.

1. Hold down (A) for about two seconds. This causes the hours digit to flash.

2. Use (D) and (B) to change the timer hours setting.

3. Press (C). This causes the minutes digits to flash.

4. Use (D) and (B) to change the timer minutes setting.

5. Press (C). This causes the seconds digits to flash.

6. Use (D) and (B) to change the target time seconds setting.

7. Press (A) to exit the setting screen.

Using the Timer

1. Use the operations below to perform a timer operation.

   - (Time up)
   - Resume
   - Pause

   (Measurement operation starts.)

   - A beeper will sound for 10 seconds to let you know when the end of a countdown is reached.

   - To reset a paused countdown to the start time, press (A).

2. Press any button to stop the tone.

Adjusting Time Settings Manually

You can use the procedure below to adjust the watch’s time and day settings when time signal reception or communication with a phone is not possible for some reason.

Setting a Home Time City

Use the procedure in this section to select a city to use as your Home City. If you are in an area that observes summer time, you can also enable or disable summer time.

Note

- The initial factory default summer time setting for all cities is “AUTO”. In many cases, the “AUTO” setting lets you use the watch without switching between summer time and standard time.
1. Hold down (A) for about two seconds until [HT] flashes.

2. Use (D) and (B) to change the Home City setting.
   - For details refer to the information below.
   - City Table

3. Press (C).

4. Use (D) to select a summer time setting.
   - Each press of (D) cycles through available settings in the sequence shown below.
     - [AUTO]
       The watch switches between standard time and summer time automatically.
     - [OFF]
       The watch always indicates standard time.
     - [ON]
       The watch always indicates summer time.

5. Press (A) to exit the setting screen.

Setting the Time/Date

1. Hold down (A) for about two seconds until [HT] flashes.

2. Keep pressing (C) until the setting you want to change is flashing.
   - Each press of (C) moves the flashing to the next setting in the sequence shown below.

3. Configure the date and time settings.
   - To reset the seconds to 00: Press (D).
   - 1 is added to the minutes when the current count is between 30 and 59 seconds.
   - Use (D) and (B) to change the other settings.

4. Repeat steps 2 and 3 to configure the other settings.

5. Press (A) to exit the setting screen.

Switching between 12-hour and 24-hour Timekeeping

You can specify either 12-hour format or 24-hour format for the time display.

1. Hold down (A) for about two seconds until [HT] flashes.

2. Press (C) eight times.
   - This causes [12H] or [24H] to flash on the display.

3. Press (D) to toggle the setting between [12H] (12-hour timekeeping) or [24H] (24-hour timekeeping).

4. Press (A) to exit the setting screen.
Changing the Date Display Format

You can select either month/day or day/month as the date display format.

1. Hold down (A) for about two seconds until [HT] flashes.

2. Press (C) nine times. This causes [M.DD] or [DD.M] to flash on the display.

3. Use (D) to select either [M.DD] (month/day) or [DD.M] (day/month).

4. Press (A) to exit the setting screen.

Specifying the Day of the Week Language

You can select any one of six languages for the day of the week display in the Timekeeping Mode.

1. Hold down (A) for about two seconds until [HT] flashes.

2. Press (C) 10 times. This causes the language setting to flash.

3. Use (D) to select a language.
   - [ENG]: English
   - [ESP]: Spanish
   - [FRA]: French
   - [DEU]: German
   - [ITA]: Italian
   - [PyC]: Russian

4. Press (A) to exit the setting screen.

Auto Light

If Auto Light is enabled, display illumination will turn on automatically whenever the watch is positioned at an angle of 40 degrees or more when it is dark.

Important!

- Auto Light may not operate properly when the watch is at a horizontal angle of 15 degrees or greater from horizontal as shown in the illustration below.
- Auto Light may operate unintentionally and run down the battery if the watch is blocked from light by your sleeve.
- Electro-static charge or magnetism can interfere with proper auto light operation. If this happens, try lowering your arm and then angle it towards your face again.
- When moving the watch you may note a slight rattling sound. This is due to operation of the auto light switch, which determines the current orientation of the watch. It does not indicate malfunction.

Note

- Auto Light is disabled when any one of the conditions below exists.
  - Alarm, timer alert, or other beeper sounding

Light

The watch has an LED light that you can use to illuminate the display for about two seconds for viewing in the dark. When turned on, illumination becomes gradually brighter and then gradually dimmer.

The watch also has an auto light function that automatically illuminates the display whenever the watch is angled for reading in the dark.

Illuminating the Display Manually

Pressing (B) turns on illumination.

- The LED light will turn off automatically if the alarm starts to sound.
Configuring the Auto Light Setting

1. Enter the Timekeeping Mode.

Navigating Between Modes

2. Hold down (B) for about three seconds.
   • Each time (B) is held down for about three seconds, Auto Light will toggle between enabled and disabled.

Specifying the Illumination Duration

You can select either two seconds or four seconds as the illumination duration.

1. Enter the Timekeeping Mode.

Navigating Between Modes

2. Hold down (A) for about two seconds until [HT] flashes.

3. Press (C) 12 times to display [LIGHT].

4. Press (D) to toggle between the two illumination duration settings.
   - [2]: 2-second illumination
   - [4]: 4-second illumination

5. Press (A) to exit the setting screen.

Other Settings

Getting Ready

Enter the Timekeeping Mode.

Navigating Between Modes

Enabling the Button Operation Tone

Use the procedure below to enable or disable the tone that sounds when you press a button.

1. Hold down (A) for about two seconds until [HT] flashes.

2. Press (C) 11 times.
   This causes [KEY♪] or [MUTE] to flash on the display.

3. Use (D) to select [KEY♪] or [MUTE].
   - [KEY♪]: Operation tone is enabled.
   - [MUTE]: Operation tone is muted.

4. Press (A) to exit the setting screen.

Note

• For details about Power Saving, refer to the information below.

Configuring Power Saving Function Settings

1. Hold down (A) for about two seconds until [HT] flashes.

2. Press (C) 14 times.
   This displays [POWER SAVING].

3. Press (D) to toggle the setting between enabled (on) and disabled (off).
   - [ON]: Power Saving enabled.
   - [OFF]: Power Saving disabled.

4. Press (A) to exit the setting screen.

Note

• Note that alarm and timer tones will still sound even while the operation tone is muted.

Returning the Watch to Its Factory Default Settings

You can use the operation below to return most of the watch’s settings to their initial factory defaults. Note, however, that it does not affect the Home City and its summer time settings.

1. Hold down (A) for about two seconds until [HT] flashes.

Note

• For details about Power Saving, refer to the information below.
2. Press (C) twice. This causes the seconds to flash.

3. Hold down (B) for about seven seconds. Hold down the button until [ALL] stops flashing on the display.

Moving to Another Time Zone

Use the procedure below to easily change day and time settings of the watch to a destination location.

● Before Boarding

1. Configure the World Time to the current time at your destination.

2. Disable auto time adjustment.

● In the aircraft, before arriving at your destination

1. Swap the origin time zone time with the destination time zone time.

   Before swapping
   After swapping

   ● Using G-SHOCK Connected to Configure Settings
   ● Using Watch Operations to Configure Settings

● After Arriving

1. Adjust the time setting. ● Triggering Immediate Time Adjustment

2. Enable auto time adjustment. ● Using the Watch in a Medical Facility or Aircraft

Other Information

This section provides non-operational information you also need to know. Refer to this information as required.

Note

• Summer time start and end dates for your current location may be different from those shown below. If this happens, you can have new summer time information for your Home City and World Time city sent to the watch by connecting the watch with a phone. If the watch is not connected with a phone, you can change the summer time setting manually.

**Supported Phones**

For information about phones that can connect with the watch, visit the CASIO website.

http://world.casio.com/os_mobile/wat/

**Specifications**

**Accuracy at normal temperature:**

±15 seconds per month average when time adjustment by time calibration signal reception or by communication with a phone is not possible.

**Timekeeping:**

Hour, minute, second, year, month, day, day of the week

a.m./p.m.(P)/24-hour timekeeping

Full Auto Calendar (2000 to 2099) *

* Year display on setting screen only.

**Signal Receive Functions:**

Auto receive, manual receive

Auto summer time switching

Auto transmitter selection (for JJY, MSF/DCF77)

Receivable call signs:

JJY (40 kHz/60 kHz), WWVB (60 kHz), MSF (60 kHz), DCF77 (77.5 kHz), BPC (68.5 kHz)

OFF: Signal receive disabled

**World Time:**

Displays current time in 39 cities (39 time zones) and for UTC, auto summer time setting

Home City/World Time City switching

**Stopwatch:**

Measurement unit: 1/100 seconds (first hour); 1 second (after first hour)

Measurement range: 23 hours, 59 minutes, 59 seconds (24 hours)

Measurement functions: Elapsed time, split time, two finishes

**Alarm:**

Time alarms

Alarms: 5 (with one snooze alarm)

Setting units: Hours, minutes

Beeper: 10 seconds

Hourly time signal

Beeps every hour on the hour
Timer:
- Measuring unit: 1 second
- Countdown range: 24 hours
- Setting unit: 1 second
- Time up: 10-second beeper

Mobile Link:
- Auto Time Correction
  - Time setting adjusted automatically at preset time.
- One-touch Time Correction
  - Manual connection and time adjustment
- Phone Finder
  - Watch operation sounds the alert sound of the mobile phone.

World Time
- Current time for approximately 300 cities selected for the watch
- Home Time/World Time swapping
- Original city function (location and name settings)
- Auto Summer Time Switching
  - Automatic switching between standard time and summer time.

Other:
- LED light, light duration setting, Full Auto Light, Power Saving, Button operation tone on/off, Month/day order, Day of the week language, Auto time correction on/off

Power Supply:
- Solar panel and one rechargeable battery
- Battery operating time: Approximately 10 months
- Conditions:
  - Not exposed to light under the conditions below.
  - Auto time correction: 4 times/day
  - Alarm: Once (10 seconds)/day
  - Illumination: Once (2 seconds)/day
  - Power Saving: 6 hours/day

Specifications are subject to change without notice.

Mobile Link Precautions

- Legal Precautions
  - This watch complies with or has received approval under the radio laws of various countries and geographical areas. Using this watch in an area where it does not comply with or has not received approval under applicable radio laws may be a criminal offense. For details, visit the CASIO Website.
  - http://world.casio.com/ce/BLE/
  - Use of this watch inside of aircraft is restricted under the aviation laws of each country. Be sure to follow the instructions of airline personnel.

- Safety Precautions

  △ WARNING Wireless
  - Inside of a medical facility or on an aircraft, be sure to follow the instructions of persons in charge concerning the use of radio wave emitting devices. Electromagnetism emitted by the watch may affect instrumentation, which creates the risk of accident.
  - Do not use this watch in the vicinity of high-precision electronic equipment or electronic equipment that handles weak signals. Doing so can cause operational or other problems with the electronic equipment, which creates the risk of accident.
  - People who are fitted with a pacemaker should keep this watch away from their chest area. Magnetism can affect the operation of pacemakers and other medical devices. Should you ever start to feel any abnormality, immediately move the watch away from you and consult a physician.

- Precautions when using Mobile Link
  - When using this watch in combination with a phone, keep the watch and phone close to each other. A range of two meters is recommended as a guideline, but the local environment (walls, furniture, etc.), the structure of a building, and other factors may require a much closer range.
  - This watch can be affected by other devices (electrical devices, audio-visual equipment, office equipment, etc.). In particular, it can be affected by operation of a microwave oven. The watch may not be able to communicate normally with a phone if a microwave oven is operating nearby. Conversely, this watch may cause noise in radio reception and the video image of a TV.

- Bluetooth of this watch uses the same frequency band (2.4 GHz) as wireless LAN devices, and use of such devices in close proximity of this watch may result in radio interference, slower communication speeds and noise for the watch and the wireless LAN device, or even communication failure.

- Stopping Radio Wave Emission by This Watch
  - The watch is emitting radio waves whenever $\square$ is flashing or displayed.
  - In addition, the watch also connects phone automatically four times a day to adjust its time setting.
  - When in a hospital, on an aircraft, or in any other area where the use of radio waves is not allowed, use the operations below to stop radio wave generation.
  - Stopping Radio Wave Generation
  - Press any button to terminate the Bluetooth connection.

- Disabling Auto Time Adjustment
  - Configure G-SHOCK Connected settings to disable time adjustment between the watch and phone.

Using the Watch in a Medical Facility or Aircraft

Troubleshooting

Signal Reception (Time Calibration Signal)

Q1 The watch cannot perform a receive operation.

Is the watch's battery charged?
Signal reception is not possible while battery power is low. Keep the watch exposed to light until it recharges sufficiently.

Solar Charging

Is the watch in the Timekeeping Mode?
Time signal receive is performed only while the watch is in the Timekeeping Mode. Return to the Timekeeping Mode.

Navigating Between Modes

Is your Home City setting correct for your location?
The watch will not indicate the correct time if the Home City setting is wrong. Change your Home City setting so it correctly reflects your location.

Setting a Home Time City

Is the watch connected with a phone?
Auto receive of signals by the watch is disabled while it is connected with a phone.

Time Adjustment Using a Time Signal

After checking the above, the watch still cannot perform a receive operation.

Time calibration signal reception is not possible under the conditions described below.
- When watch is at Level 2 power saving
- Timer countdown operation in progress
If successful reception is not possible for some reason, you can adjust the time and day settings manually.

Q2 The signal receive operation always fails.

Is the watch in a location that is appropriate for signal reception?
Check your surroundings and move the watch to a location where signal reception is better.

Appropriate Signal Reception Location

Did you avoid touching the watch while the receive operation was in progress?
Minimize movement of the watch and do not perform any watch operation while a receive operation is in progress.

Enabling/Disabling an Alarm or the Hourly Time Signal

Is there an alarm configured to sound during the same period that the signal receive operation is performed?
Receive stops if an alarm operation starts while it is being performed. Disable the alarm.

Q3 Signal reception should have been successful, but the watch's time and/or day is wrong.

Adjust time and day settings manually.

Adjusting Time Settings Manually

I can’t pair the watch with a phone.

Q1 I’ve never been able to establish a (pairing) connection between the watch and phone.

Are you using a supported phone model?
Check if the phone model and its operating system are supported by the watch.
For information about supported phone models, visit the CASIO Website.

Did you install G-SHOCK Connected on your phone?
G-SHOCK Connected needs to be installed on your phone in order to connect with the watch.

Install the app on your phone.

Are your phone’s Bluetooth settings configured correctly?
Configure the phone’s Bluetooth settings. For details about setting procedures, see your phone documentation.

iPhone Users
- “Settings” → “Bluetooth” → On
- “Settings” → “Privacy” → “Bluetooth Sharing” → “G-SHOCK Connected” → On

Android Users
- Enable Bluetooth.

Other than the above.
Some phones need to have BT Smart disabled to use G-SHOCK Connected. For details about setting procedures, see your phone documentation.

On the Home Screen, tap: “Menu” → “Settings” → “Bluetooth” → “Menu” → “BT Smart settings” → “Disable”.

Page 20
I can’t reconnect the watch and phone.

Q1 The watch will not re-connect with the phone after they are disconnected.

Is G-SHOCK Connected running?

The watch cannot re-connect with the phone unless G-SHOCK Connected is running on the phone. On the phone’s Home Screen, tap the “G-SHOCK Connected” icon. Then on the watch, hold down the MODE button (C) for about three seconds.

Have you tried turning your phone off and then back on again?

Turn the phone off and then back on, and then tap the “G-SHOCK Connected” icon. Next, on the watch, hold down the MODE button (C) for about three seconds.

Q2 I can’t connect while my phone is in the Airplane Mode.

Connection with the watch is not possible while the phone is in the Airplane Mode. After exiting the phone’s Airplane Mode, go to its Home Screen and tap the “G-SHOCK Connected” icon. Then on the watch, hold down the MODE button (C) for about three seconds.

Q3 I changed the phone’s Bluetooth from enabled to disabled, and now I can’t connect anymore.

On the phone, re-enable Bluetooth, and then go to the Home Screen and tap the “G-SHOCK Connected” icon. Next, on the watch, hold down the MODE button (C) for about three seconds.

Q4 I can’t connect after turning off the phone.

Turn on the phone and tap the “G-SHOCK Connected” icon. Then on the watch, hold down the MODE button (C) for about three seconds.

Phone-Watch Connection

Q1 I can’t establish a connection between the phone and watch.

Have you tried turning your phone off and then back on again?

Turn the phone off and then back on, and then tap the “G-SHOCK Connected” icon. Next, on the watch, hold down the MODE button (C) for about three seconds.

Has the watch been re-paired with the phone?

After deleting pairing information from G-SHOCK Connected, re-pair them.

If you are unable to establish a connection...

Delete the pairing information from the watch, and then re-pair the watch and phone. See “Unpairing”.

Changing to a Different Phone Model

Q1 Connecting the current watch to another phone.

Pair the watch with the phone.

Auto Time Adjustment by Bluetooth Connection (Time Adjustment)

Q1 When does the watch adjust its time?

The watch will connect with the phone and perform auto time adjustment at around 12:30 a.m., 6:30 a.m., 12:30 p.m. and 6:30 p.m. The connection is automatically terminated after auto time adjustment is complete. Also, time signal auto receive will be performed if there has been no auto time adjustment based on connection between the watch and phone for more than one day.

Q2 Auto time adjustment is not performed at a scheduled time.

Is auto time adjustment not being performed according to its normal schedule?

Note that auto time adjustment is not performed for 24 hours after swapping of the Home Time and World Time, or after the time setting is adjusted manually on the watch. Auto time adjustment will resume 24 hours after either of the above operations is performed.

Is a timer countdown operation in progress?

Auto time adjustment will not start at the scheduled times if a timer countdown operation is in progress. Stop the timer countdown operation.

Is auto time adjustment enabled?

Auto time adjustment will not be performed at the scheduled times unless it is enabled. Enable auto time adjustment.

Using the Watch in a Medical Facility or Aircraft
Q3 The watch does not connect with a phone and adjust its time when I press (D).
The watch will not adjust its time if you press (D) while a timer countdown operation is in progress. Stop the timer countdown operation and then press (D) again.

Q4 Time is not displayed correctly.
The phone’s time setting may be incorrect because it is unable to connect with its network due to being out of range, etc. If this happens, connect the phone to its network and then adjust the time setting.

Alarms

Q1 The alarm does not sound.

Is the watch’s battery charged?
Keep the watch exposed to light until it recharges sufficiently.

Solar Charging

Is the alarm enabled?
Enable the alarm.

Enabling/Disabling an Alarm or the Hourly Time Signal
